Green Gas Solutions

Working together
for a shared future

We're one of the UK's leading authorities
in green gas solutions.

Our efforts have made carbon equivalent
savings of 220,000 tonnes each year.

- 1st** UK biomethane to grid plant
- 98%** plant availability
- 25+** we played a key role in over 25 projects
- 30%** we've been involved in 30% of UK projects
- £40m** of assets invested in biomethane projects

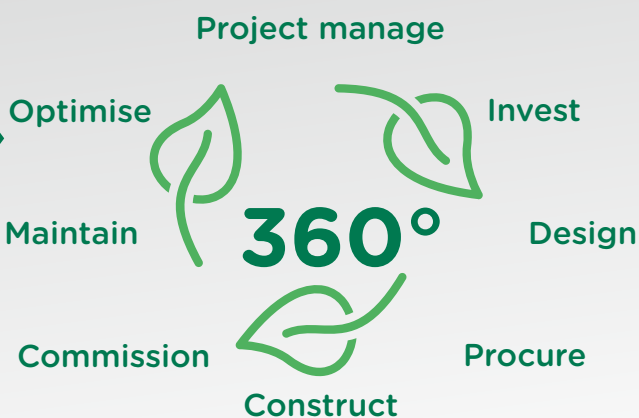

SGN Commercial Services is part of the SGN Group

5.9m customers
3,800+ employees

£40m green investments
£1,235m turnover

74,000 km gas pipes
£5.7bn asset value

Recognised leaders

Recognised by the industry and our peers as market leaders for our award winning gas to grid solutions

Innovating

We pioneered the UK's first biomethane to grid plants and the first injection hub

Why SGN?

High performing

We can help minimise plant downtime, achieving high performance for our customers

Strong technical team

We're a highly experienced, multi-disciplined team

Long-term stable partner

We provide support for the life of the plant, and have a strong relationship with key stakeholders

We're preparing for a **changing climate** including undertaking cutting-edge research, development and demonstrations of greener gas.

We're working towards minimising our own carbon footprint to help the UK decarbonise **further and faster**.

Our **safety-first** culture not only provides our clients a wide-range of bespoke professional services, but also offers world-leading green gas solutions.

Our team delivers:

Biomethane-to-grid
Complete biogas to grid solution

- Funding
- Integrated design
- Procurement and construction
- Project management and commissioning

Optimisation
Increasing revenues and resilience

- Reducing propane
- Expanding capacity
- Plant enhancements
- Carbon capture, utilisation and storage (CCUS)

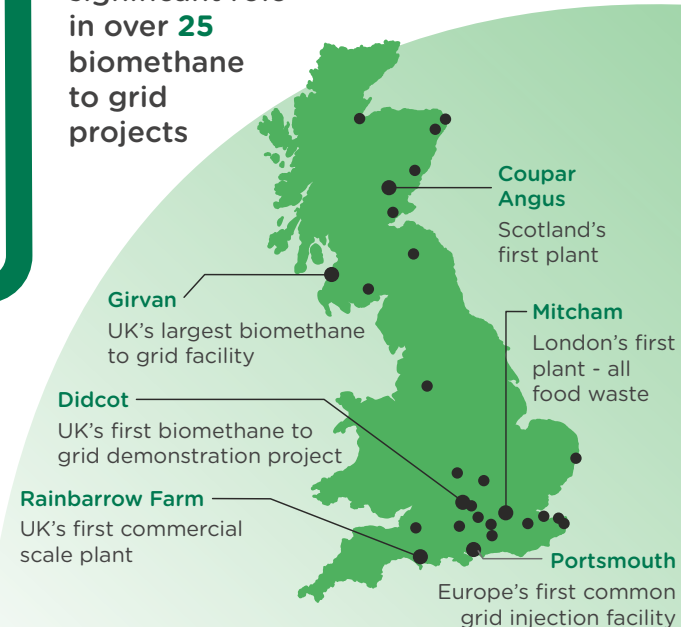

Maintenance
Scheduled and responsive attendance

- Biogas upgraders
- Grid entry units (GEU)
- Compliance and safety
- Control, gas quality and metering

Grid injection hub
Remote gas to grid connection

- Fast download speeds
- Accessible by multiple sites
- Blending to avoiding propane use
- Overcoming grid capacity constraints

We've played a significant role in over **25** biomethane to grid projects
